

## AMERICAN WHITE WINE

Vintage: 2020  
Location: CA

## PROFILE

Although less versatile of a grape than Chardonnay or Muscat Blanc, Riesling is widely adapted and grown on numerous continents. The majority of Riesling production still occurs in Germany, where this grape originated. Sought after for its aromatics and age-worthiness, Riesling wines can be found in a variety of styles from dry to sweet.

Regardless of the style, Rieslings tend to be light in body, with relatively high acidity. For those that don't enjoy high acid wines, sweet Rieslings are recommended. These wines typical have strong aromatics of citrus peel, honey, white flowers, and, most distinctly, petroleum

## DETAILS

Bottling Date: 10/07/2021  
Case Production: 90

ABV: 12.0  
Residual Sugar: 3.0 %  
Final TA: 6.0 g/L  
pH: 3.21  
Free SO<sub>2</sub>: 40 ppm

# Riesling

Available in 750 mL bottles

## WINEMAKING

### FERMENTATION

9 days

As with most of our white wines, Riesling is imported to us as juice. Upon arrival, juice was racked into a stainless-steel tank and brought up to temperature in order to begin fermentation. Yeast for this fermentation was selected for its ability to produce crisp and clean wines. After fermentation was completed, the wine was racked off the lees and cold stabilized to help encourage settling of sediment and to remove tartrates prior to filtration

### AGING

11 months

This wine was aged and conditioned in stainless steel tanks for eleven months prior to bottling

## TASTING NOTES

### Aroma

Soft notes of honey and pear can be found hidden behind the dominant aroma of beeswax

### Taste

Strong notes of Honeycrisp apple, pear, and jasmine are accentuated by a smooth and bright finish. Each sip provides an enjoyable honey-like sweetness on the tongue

### Serving & Pairing Suggestions

Best served chilled at approximately 45 F°. For food pairings, grab some take-out from your favorite local Chinese restaurant

## TASTING CHART
